

# Pedro Rojas Campuzano

Chief of Staff · Operations & Systems · AI Implementation

Mexico City, MX  
+52 55 9186 1118  
[pedro.rojas.campuzano@gmail.com](mailto:pedro.rojas.campuzano@gmail.com)  
[linkedin.com/in/pedro-rojas-campuzano](https://www.linkedin.com/in/pedro-rojas-campuzano)

Operator and project manager with 7+ years running complex, multi-stakeholder programs: from 1,550 MW solar portfolios and 250,000+ hectare carbon-credit projects to cross-border operations for a venture-backed AI startup. Civil engineer by training, systems thinker by practice; I design and maintain my own AI tooling (personal RAG, custom agent libraries, MCP servers, automation pipelines) and use it daily for work and experimentation. Trilingual: Spanish native, English professional, Mandarin intermediate.

## // LANGUAGES

|          |              |
|----------|--------------|
| Spanish  | Native       |
| English  | C1           |
| Mandarin | Intermediate |

## // CORE COMPETENCIES

Chief-of-Staff & operations · Program & portfolio management · Cross-border entity & vendor ops · Stakeholder & investor relations · Notion operating-system design · Workflow automation (n8n, APIs) · Hands-on AI implementation · SOP & process standardization

## // TOOLS

Notion · n8n · Linear · Google Cloud · Stripe / Metronome · Datadog · QGIS / ArcGIS · Python (basic) · LLM APIs (Claude, OpenAI, Gemini)

## // EDUCATION

### UNAM

Civil Engineering

### UNAM Faculty of Engineering

Diploma in Management Skills

### Guangxi Normal University · China

Chinese Language Program · 2009–2010

## // EXPERIENCE

### Channel Partner – Semantiks

2026 – present

Mexico City / Remote · Venture-backed AI startup (Delaware C-Corp + Mexican subsidiary)

- Represent the AI Agents platform and the Professional Services practice (Google Cloud Partner) to my LATAM network: founders, enterprise buyers, and M&A advisories.
- Source data-engineering and BI opportunities for the professional-services vertical across firms in Mexico and the US.
- Previously supported operations and cross-border admin during a short transition period (Mar–Apr 2026).
- Active in the LangChain Mexico community (Semantiks is the official Ambassador); help organize events that connect developers, founders, and enterprise buyers.

### Independent Consultant – Operations & Automation

2024 – present

NotionOps / Self-employed · Remote

- Design and deploy Notion-based operating systems (CRMs, deal pipelines, client dashboards, knowledge bases) for M&A advisories, consultancies, and project-based firms in Mexico and the US.
- Build n8n workflow automations that remove manual data entry across email, calendar, billing, and project tools; deliver Loom walkthroughs and iterative training so teams become self-sufficient.
- Selected clients: CenterPoint Business Advisors (M&A, US), Jeff Kibbie, independent consultancies in LATAM.

### Consultant – Urban Resilience & Green Infrastructure

2025 – present

Sponge City Program (Prof. Kongjian Yu) · Mexico

- Develop executive proposals, roadmaps, and stakeholder maps for green-infrastructure initiatives; coordinate municipal partners (Atizapán, Tizapán) and institutional funders (FMCN).

### Program Manager – Nature-Based Solutions & Carbon Markets

2021 – 2024

Cultivo · Mexico / Remote

- Led implementation of regenerative-ranching carbon-credit projects across 250,000+ hectares in northern Mexico, coordinating science, field, finance, and legal workstreams across 10+ ejidos and indigenous communities.
- Owned Verra (VCS) and Climate Action Reserve (CAR) registration, validation, and verification cycles; prepared technical documentation for third-party auditors (VVBs).
- Cut third-party verification cost by 30% by redesigning the monitoring framework while maintaining rigorous compliance with certification standards.
- Managed relationships with international natural-capital investors and corporate offtakers (including Aeroméxico due diligence); supported executive reporting to steering committees.

## Project Developer / Project Manager (Solar)

2019 – 2021

Mater Energía · Mexico

- Managed a 1,550 MW photovoltaic development portfolio across multiple sites with parallel land, regulatory, environmental, and community workstreams.
- Led negotiations with private and communal landowners (ejidos); ran GIS-based feasibility for new sites and maintained tracking databases for multi-project permitting.

## Deputy Administrative Coordinator – International Operations

2018 – 2019

Xinhua News Agency · Mexico City

- Trilingual liaison (Spanish–English–Mandarin) between Beijing HQ and the Mexico bureau; managed logistics, immigration, and admin for international correspondents in a fast-paced cross-cultural environment.

## Technical Supervisor – Infrastructure Development

2017 – 2018

WSP · Mexico City

- Supervised infrastructure projects totaling \$50M+ USD; coordinated quality-control activities with contractors and clients.

## // PERSONAL AI DESIGN & IMPLEMENTATION

---

- **Personal RAG over my knowledge base:** custom MCP server with embeddings (MiniLM, 384d) indexing 13,000+ Notion, Drive, and OneDrive documents; daily use for context retrieval.
- **Library of ~70 custom skills / slash-commands** for recurring workflows: email drafting, code review, deep research, day closing, project onboarding.
- **Custom MCP (Model Context Protocol) servers** unifying Notion / Drive / OneDrive search, automating daily logs, and archiving agent work sessions.
- **Multi-agent orchestration with Claude** (Opus / Sonnet) and parallel sub-agents for research, planning, and code delivery; integrated with GitHub, Gmail, Linear, and Slack via MCPs.
- **Automation pipelines (n8n + Apps Script)** across Notion, Gmail, Calendar, and Drive to sync tasks, agendas, billing, and operational logs.

## // SELECTED PROJECTS & ENGAGEMENTS

---

### Cultivo · Aeroméxico

Due diligence, impact narrative, and documentation for a corporate offtake deal backed by Verra-registered regenerative-ranching credits.

### Sponge City

Coordinated with Prof. Kongjian Yu's team, municipal governments, and FMCN on nature-based urban-resilience proposals.

### Mater · 1,550 MW Solar

Parallel land, permitting, and community workstreams for utility-scale photovoltaic sites across Puebla, Estado de México, and other regions.

### CenterPoint (M&A, US)

Full Notion-based deal-flow and CRM system; automated email / calendar / drive sync via n8n.
